Safety instructions

1. **Excessive sweating may cause stains on wood and damage to electrical appliances. Please use one or two towel placed on the bench and on the floor heater to absorb sweat when using the sauna.**
2. **Indoor sauna room is not waterproof, please do not spray water in the interior or exterior of sauna.**
3. Do not use liquid cleaners or aerosol cleansers on the interior or exterior of the sauna. Only use a damp cloth for cleaning.
4. Use of chemicals will damage the wood and any natural protection layer inherent in the wood.
5. To reduce the risk of injury, do not allow children to use the sauna unless they are closely supervised at all times.
6. Persons with health conditions or using medications should consult their physicians before using sauna.
7. Excessive temperatures have a high potential for causing fetal damage during the early months of pregnancy. Pregnant or possibly pregnant women should contact their physician prior to using the sauna.
8. Persons using medications should consult a physician before using the sauna since some medications may induce drowsiness while others may affect heart rate, blood pressure, and circulation.
9. Please exit immediately if you feel uncomfortable, dizzy or sleepy.
10. **WARNING:** The use of alcohol, drugs, or medications prior to or during the sauna session may lead to unconsciousness.
11. Remove all jewelry before you enter the sauna.
12. Never sleep inside the sauna while the unit is in full operation.
13. Do not attempt any repair without consulting the manufacturer first. Unauthorized repair attempts will void manufacturer's warranty.

Electrical Requirements

Please follow all instructions carefully. Each sauna will require a dedicated circuit when plugged in an outlet according to the image below. A dedicated circuit requires that no other appliance should share the outlet/circuit with the sauna. Failure to comply with this requirement may cause electrical interruption and diminished performance. It is recommended that a qualified electrician install an extra dedicated electrical socket for proper sauna functionality and to avoid any potential electrical hazards. Please make sure the sauna is properly grounded. Serious injury may result if proper electrical requirements are not met. Should you have any questions, please do not hesitate to contact the supplier.

Power Plug

For 1-2 person infrared sauna: Australia 10A power plug

For 3-4 person infrared sauna: Australia 15A power plug

10A power plug

15A power plug

Installation Instructions

Please read the following directions carefully. The sauna installation may require a minimum of 2 people. You should not try to install the sauna on your own as damage will easily occur.

Caution

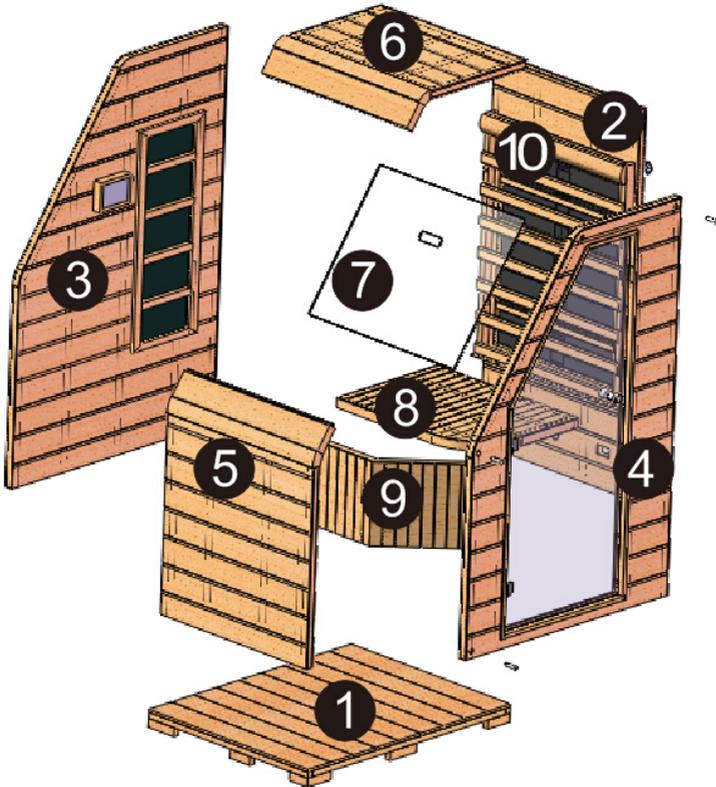

- 1- No plumbing or plumbing fixtures should be placed in the sauna.
- 2- Install the sauna on a completely level surface.
- 3- Keep all liquids away from the heating panels.
- 4- Keep the sauna away from any potential hazards including any water source or liquids. Select a dry suitable location for the sauna installation.
- 5- **Indoor sauna room is best placed indoors such as bathroom, pool area, or it can be placed outdoors where only fully covered areas, such as on a deck, terraces or balconies to protect it from the rain, moisture and other elements in order to maintain the naturally untreated Canadian Hemlock finish.**
- 6- Do not expose the heater elements to any water source or liquids as it may cause electrical shock.
- 7- Flammable objects and corrosive chemical substances should be kept far away from the sauna.
- 8- Do not plug any other appliances into the outlet sharing with the infrared sauna.

Your infrared sauna will come packaged **in one or more boxes**. Please make sure that you open the boxes face up. And be mindful of the fragile parts and glass enclosed during the opening process.

Installation Guide for 1 Person Sauna KY-1D6

This content is the instruction for the 1-person model KY-1D6, the structure may vary from different models. Please refer to the correct article for a specified model.

Structure and Components

1- Floor panel

2- Rear panel

3- Left side panel

4- Right side panel

5- Front panel

6- Top panel

7- Glass window

8- Sitting bench

9- Sitting baffle

10- Backrest

1. Floor Panel

Place the floor panel flat on the desired location. Make sure to leave a space around the side walls for one person to stand and install the side panels. And make sure to confirm the front side and the back side. (Figure B-1)

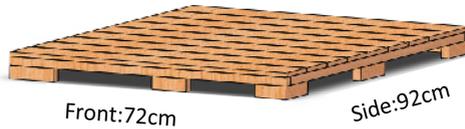

Figure B-1: Floor Panel

2. Rear Panel

Align the rear panel with the floor panel's corresponding battens; make sure both panels are in line.

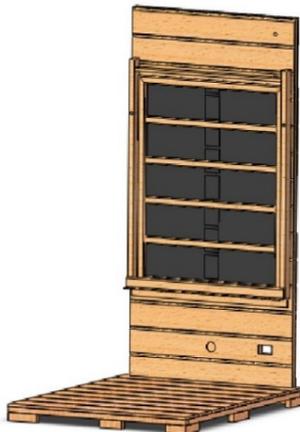

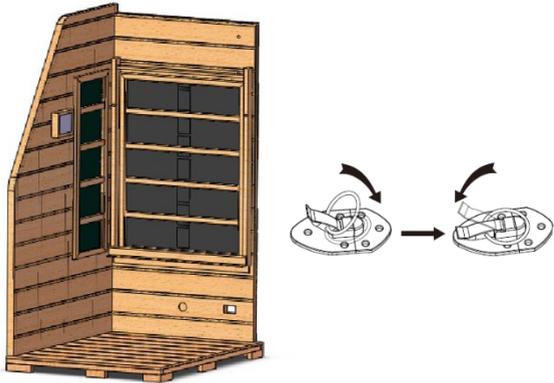

Figure B-2: Rear Panel

3. Side Panels

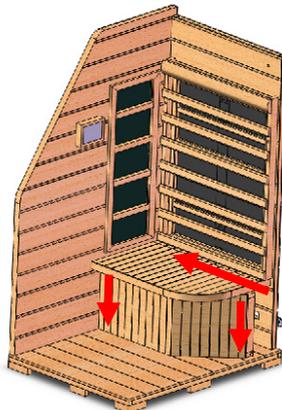

Align the left panel with the floor panel's corresponding battens. Make sure the left panel fits flush into the back panel. (Figure B-3). Using buckles in the corner to connect both panels. Do the same way for the right and the back panel.

(Figure B-3: Back Panel and Left Panel)

4. Sitting Bench

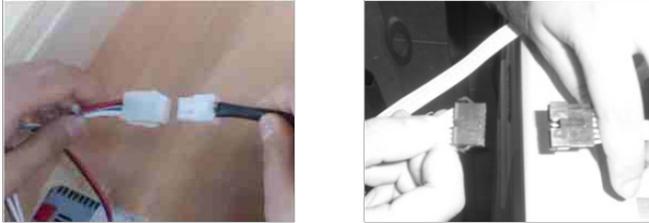

Slide the sitting baffle down vertically into the slot within the back and right panel and fix the position. Then slide the sitting bench on it horizontally and fix it with screws. Then fix the backrest onto the back panel with screws. (Figure B-4)

(Figure B-4: Sitting Baffle and Bench)

Notes:

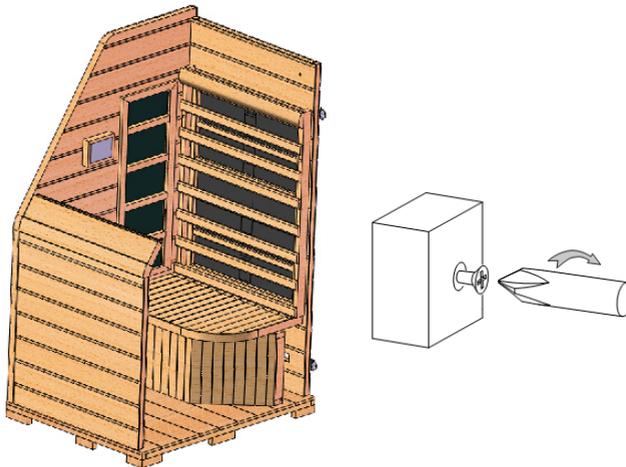

- During the process of installing the sitting bench, make sure that all wires (mentioned below) and connecting plugs pass through the corresponding holes in the rear panel. (Figure B-5)
- Connect all wires and connectors to the appropriate sockets on the rear panel. Make sure all plugs are securely connected.

(Figure B-5: Connecting Wires)

5. Front Panel

Align the front panel with floor panel's corresponding battens, and then screw it with the left board respectively. (Figure: B-6)

(Figure B-6: Front Panel)

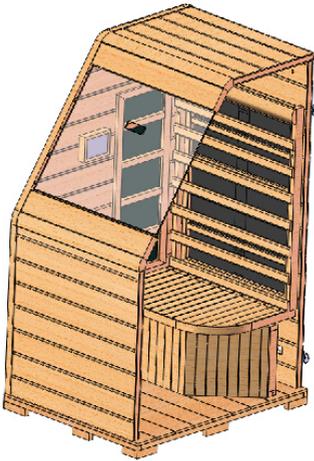

6. Window and Top Panel

When installing the window and top panel, be careful of holding tight the glass. The top panel needs to be fixed from the top of the left and right panels with screws. (Figure: B-7)

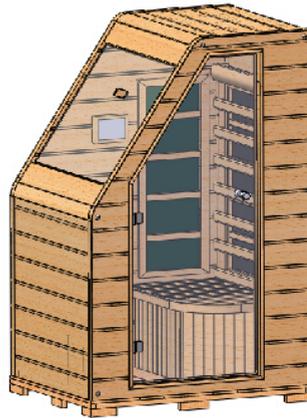

7. Right Panel

Installing the right panel by using screws to fix with the front and the top panel. Then fix the back board by connecting the buckles, and install the door handle. (Figure: B-8)

Put the wires of the front panel and back panel into the cabinet to avoid pressing the wires during installation. Open the door, raise the top board high enough to test if it fits with the surrounding boards, then put it down after testing.

(Figure B-7: Top Panel)

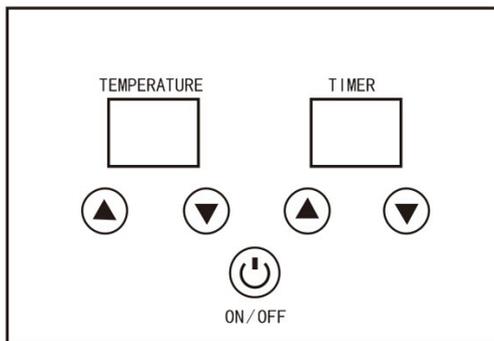

(Figure B-8: Right Panel)

Making sure all steps are finished correctly, plug in the power and try using the sauna at first to make sure it will work properly.

- Installation Completed -

Operation

Check all the circuitry and the plug meet all requirements. Set the temperature and time to a comfortable level, normally, 60 minutes at 50-65°C (122°F-140°F)

Note: If ambient temperature is lower than 18.3°C(65°F), please set the temperature at about 122 °F; and if ambient temperature is higher than 18.3°C(65°F), please set the temperature at about 65°C(140 °F).

Control

See electrical label on the unit, and plug the sauna into a proper wall outlet. Do not share the outlet with any other appliances. Plug the unit into the outlet and use the ON/OFF switch to activate the sauna. Sauna should be unplugged when not in use.

Press the temperature button  to increase or decrease the temperature. The temperature setting will increase or decrease one degree every time the button is pushed. If pressed for three seconds, the setting will increase quickly. After the sauna reaches the desired temperature, the heating board turns off.

Press the time button  to set the timer from 5 to 60 minutes. If pressed for three seconds, the timer will increase quickly. When the display reads '05', the timer will buzz then the machine will shut off automatically after 5 minutes. To extend the sauna session, reset the timer again.

Usage Guide

Unlike a traditional sauna, infrared heats the body directly. Air temperature in the sauna is not as important as the type and quality of the infrared being received. We have below suggestions:

1. **Please allow your sauna to warm up for at least 20-30 minutes until it reaches 46-51°C degrees depending on the starting ambient air temperature.** If your sauna is outside, such as in your garage or a patio, you will expect longer heat-up times.
2. When you enter the sauna, set the time to the desired session time and turn the thermostat up to 150+°F / 65°C. This will keep the heaters on the entire time to ensure that you are receiving constant infrared heat.
3. Always start using the sauna within 10°C degrees before it reaches the set temperature in order to receive the most benefits out of the infrared heaters. For example, if you set the sauna to 60°C degrees, you should start using the sauna when it reaches 50°C degrees.
4. **Infrared heater warms your body directly, your body will always feel hotter than the temperature shown on the control panel.** The temperature sensor only can reflect part of the actual room temperature but not your body temperature.

Tip:

- Please keep the vent closed on the ceiling to speed up the pre-heating process.
- If the sauna becomes stuffy, open the vent on the ceiling to allow fresh air into the sauna.
- It is recommended not to exceed 40 minutes per session.
- Oil and lotions tend to decrease perspiration by blocking pores. Apply these after your session for best results.

- The appropriate temperature for a sauna depends on your needs or preference. Most of customers prefer an average use temperature of 125°F (52°C) degrees.

A Reminder when having your sauna

The temperature of the infrared sauna may take a long time to reach the maximum set temperature. This depends on the ambient temperature, humidity, airflow, the frequency of opening and closing doors, etc. However, slowly reaching the maximum set temperature does not affect normal use.

As your body is close to the heaters, your apparent temperature is always higher than the temperature shown on the display. This is because when the sensor attached to the ceiling which is far from the heaters may not reflect the actual set temperature inside the room. The infrared heating panels will continue to heat, and the body temperature will continue to rise. Please keep the vent close just in case there is cold air always coming in.

Precautions

- Drink liquids prior to and after your session.
- Prepare 2-3 towels for maximum comfort. Put one towel on the floor heater but not fully covered to make sure the sweats won't drop into the floor heater
- Do not left the wet towels inside your sauna that could harm the interior of your sauna.
- If the temperature becomes unbearable, decrease the temperature, open the vent or shut off the sauna immediately.
- Do not use if you are pregnant or have serious inflammation, a fever, a communicable disease, acute bleeding, or when intoxicated.
- Do not consume alcohol or drugs when using the sauna.

- Do not splash water on the heaters or any electrical component inside the sauna.
- All repairs need to be authorized by the supplier's representative; otherwise, product warranty may be voided.

Cleaning and Maintenance

Please use one or two towel placed on the bench and on the floor heater to absorb sweat when using the sauna. Excessive sweating may cause stains on wood and damage to electrical appliances.

Use a clean damp towel to wipe off the bench, floor and around the back panel. Do not use a towel that is too wet and can drip water inside the sauna and do not use cleaning agents inside the sauna.

Make sure to keep the sauna dry and clean. Do not leave towels or water glasses or bottles inside the sauna after use. Wipe the exterior surface of the sauna with a towel and clean the glass at least once a month.

Wood Care

If the sauna exterior body become scratched or scuffed, it can be concealed by using a small amount of furniture polish, oil or other furniture treatment. The interior blemishes, scratches, or scuffs can be either left alone, sanded or a combination of gluing plus sanding. Please avoid any treatment containing benzene or a high concentration of alcohol.

The body of outdoor models need to be maintained on a regular bases (Once every 6 months to a year) by polishing or resealing the body as needed. If the varnish is cracked or worn off, sand the surface and re-varnish the affected area. Consult your local handyman or furniture repair professional for more details on how to maintain wood in an outdoor environment.

Your Kylin sauna is made of the Canadian Hemlock Wood. All wood products may have variations in the color, grain, and may have irregularities such as knots, and fine cracks. These reflect the natural beauty of the wood and should not be considered defects.

Sauna Benefits

Health Benefits

Detoxification and Body Cleansing

Detoxification is a bodily process that transforms health threatening toxic substances from our environment, diets, as well as our own bodies into something harmless or excreted. Sweat is the body's natural way to get rid of harmful toxins and cleansing our bodies through the skin. The infrared sauna waves penetrate deep below the skin to help the body to get rid of toxins buried deep under the skin.

Weight Loss

Saunas are proven to help lose weight and burn calories. According to the Journal of the American Medical Association, a sauna session can burn between 300-700 calories. This finding was also backed by Dr Oz's explanation of infrared saunas during a segment of the Oprah Winfrey show.

Pain and Arthritis Relief

The Saunas infrared waves penetrate deep into the muscles for long lasting pain relief. Moreover, patients with rheumatoid arthritis will benefit in the alleviation of short-term pain, stiffness and reduced fatigue.

Skin Purification

During a sauna session, skin is cleansed and dead cells are replaced, keeping the skin in good working condition. Sauna heat also relaxes facial tensions, and improves skin elasticity. The process of sweating also rinses bacteria out of the epidermal layer and sweat ducts.

Cardiovascular Workout

Finnish researchers have reported that the regular use of saunas helps maintain the blood vessels in a healthier condition. Vessels become more extended, elastic and pliable due to regular dilation and contraction from the process of heating and cooling the body repeatedly.

Lower Blood Pressure and Improved Circulation

Blood vessel dilation brings blood closer to the surface of the skin and as blood vessels expand to accommodate increased blood flow, circulation in the extremities improves, and as a result the blood pressure becomes lower. The effect on the blood pressure is temporary, but medical research shows that frequent sauna bathing can make person's blood pressure level stay lower as well.

DISCLAIMER:

The Sauna and its affiliate is to be not treated as medical advice, education or treatment. The information contained in this manual is for general information purposes only and does not address individual circumstances or medical conditions. Suitability will vary person to person and the information provided in this manual should not be relied solely upon in making decisions about your health. Always consult your doctor for medical advice.

Saunas and Contraindications

Saunas and Medications

Individuals who are using prescription drugs should seek the advice of their personal physician or a pharmacist for possible changes in the drugs effect when the body is exposed to far infrared waves or elevated body temperatures. Diuretics, barbiturates and beta-blockers may impair the body's natural heat loss mechanisms. Some over the counter drugs such as antihistamines may also cause the body to be more prone to heat stroke.

Saunas and Children

The core body temperature of children rises much faster than adults. This occurs due to a higher metabolic rate per body mass, limited circulatory adaptation to increased cardiac demands and the inability to regulate body temperature by sweating. Consult with your child's pediatrician before allowing your child to use the sauna.

Saunas and the Elderly

The ability to maintain core body temperature decreases with age. This is primarily due to circulatory conditions and decreased sweat gland function. The body must be able to activate its natural cooling processes in order to maintain core body temperature.

Saunas and Cardiovascular Conditions

Individuals with cardiovascular conditions or problems (hypertension / hypotension), congestive heart failure, impaired coronary circulation or those who are taking medications, which might affect blood pressure, should exercise extreme caution when exposed to prolonged heat. Heat stress increases cardiac output, blood flow and in an effort to transfer internal body heat to the outside environment via the skin (perspiration) and respiratory system. This takes place primarily due to major changes in the heart rate, which has the potential to increase by thirty (30) beats per minute for each degree increase in core body temperature.

Saunas and Alcohol

Contrary to popular belief, it is not advisable to attempt to "Sweat Out" a hangover. Alcohol intoxication decreases a person's judgment; therefore, a person may not realise it when the body has a negative reaction to high heat. Alcohol also increases the heart rate, which may be further increased by heat stress.

Saunas and Chronic Conditions / Diseases Associated with a Reduced Ability to Sweat or Perspire

Parkinson's, Multiple Sclerosis, Central Nervous System Tumors and Diabetes with Neuropathy are conditions that are associated with impaired sweating.

Saunas and Hemophiliacs / Individuals Prone to Bleeding

The use of Infrared saunas should be avoided by anyone who is predisposed to bleeding.

Saunas and Fever

An individual that has a fever should not use any type of sauna.

Saunas and Insensitivity to Heat

An individual that has insensitivity to heat should not use any type of sauna.

Saunas and Pregnancy

Pregnant women should consult a physician before using any type of sauna because fetal damage can occur with a certain elevated body temperature.

Saunas and Menstruation

Heating of the low back area of women during the menstrual period may temporarily increase a woman's menstrual flow. Some women endure this process to gain the pain relief commonly associated with their cycle whereas others simply choose to avoid saunas use during this time of the month.

Saunas and Joint Injury

If you have a recent (acute) joint injury, it should not be heated for the first 48 hours after an injury or until the hot and swollen symptoms subside. If you have a joint or joints that are chronically hot and swollen, these joints may respond poorly to vigorous heating of any kind. Vigorous heating is strictly contraindicated in cases of enclosed infections be they dental, in joints or in any other tissues.

Saunas and Implants

Metal pins, rods, artificial joints or any other surgical implants generally reflect far infrared waves and thus are not heated by this system; nevertheless, you should consult your surgeon prior to using an Infrared Sauna. Certainly, the usage of an Infrared Sauna must be discontinued if you experience pain near any such implants. Silicone does absorb far infrared energy. Implanted silicone or silicone prostheses for nose or ear replacement may be warmed by the far infrared waves. Since silicone melts at over 200°C (392°F), it should not be adversely affected by the usage of Infrared saunas. It is still advised that you check with your surgeon and possibly a representative from the implant manufacturer to be certain.

In the rare event you experience pain and/or discomfort, immediately discontinue to use the sauna.

Troubleshooting

The sauna doesn't power on

- Make sure the power cord is securely connected to the power socket and the control box (on top of the sauna).
- Make sure the breaker did not turn off.
- Make sure the control panel white ribbon wire is securely connected.
- Make sure the power socket is working by trying a different device on the same socket.

Light is not working

- Try reconnecting the light connector and make sure the connection is well.
- Try replacing the light bulb.

Colour therapy light does not work

- Make sure the battery is inserted correctly.
- Make sure to point the remote directly at the remote receiver (small rounded tip next to the colour lights).
- Try a new battery.

All heaters are not working

- Make sure the heater plugs are connected securely to the control box (on top of the sauna).
- Make sure the sauna is connected to the recommended power supply.
- Make sure the heat sensor is connected securely.

One or few heaters are not working

- Make sure the heater plugs are connected securely to the control box (on top of the sauna).
- Make sure the heater plugs under the bench are connected securely.
- Floor heaters and under bench heaters are not as hot as other heaters (by design).

- Make sure the plug behind the heater is connected (you would need to unscrew the heater).

Control panel display is unusual

- If the control panel temperature display is over 150 or 230 fahrenheit, make sure to connect the heat sensor securely.
- If the control panel time display is -- (two dashes), this means the sauna is on continues working mode. Press the timer button to return to timed working mode.

For more troubleshooting advice or to report a problem, please make contact with the supplier.

Warranty Information

The Sauna warrants its products to be free of defects in material and workmanship.

This warranty extends only to:

1. a retail purchaser of a sauna or parts directly from the supplier;
2. the authorised wholesale purchaser of a sauna or parts directly from the supplier; or
3. a retail purchaser of a sauna or parts from the supplier authorised wholesaler.

However, in the event of a sale, transfer or conveyance of a sauna or parts from any of the three (3) proceeding persons or entities, any rights, duties and obligations associated with this warranty shall be null and void and of no further force and effect. The sauna or parts must be purchased and used within one year of the manufactured date.

The sauna or parts must be placed in an indoor environment unless the sauna or parts are specifically designed for outdoor use. If an indoor sauna or parts are placed in an outdoor environment, warranty shall be null and void and of no further force and effect. The controls, heaters, electrical parts and wiring must be kept dry at all times and not exposed to any water or liquids.

Residential Use:

Indoor Models Parts: Five (5) year warranty on structure, controls and heaters.

Labour: One (1) year labour in free service area.

Commercial Use:

Indoor Models Parts: One (1) year warranty on structure, controls and heaters.

Labour: Six (6) months labour in free service area.

Customers within free service area will enjoy free labour and parts service, or extra call out fee is required after the warranty period. Free on-site service area is within 40 km from Blackburn VIC 3130.

The warranty begins on the original date of purchase, and is valid only on products purchased and used in the pointed market. To receive warranty service, the purchaser must contact the supplier to determine the problem and service procedures. Warranty service can only be performed by the supplier authorised service center. The original dated bill of sale must be presented upon request as proof of purchase to the supplier or the supplier authorised service center. In-home service will be provided during the warranty labour period subject to availability within the eligible area in Australia. In-home service is not available in all areas. To receive in-home service, the product must be unobstructed and accessible from floor level to service personnel. If during in-home service repair cannot be completed, it may be necessary to remove, repair and return the product. If in-home service is unavailable, the supplier may elect, at our option, to provide for transportation of our choice to and from the supplier authorised service center. Otherwise, transportation to and from the supplier authorised service center is the responsibility of the purchaser.

This warranty covers manufacturing defects in materials and workmanship encountered in normal use of this product, and shall not apply to the following, including, but not limited to: damage which occurs in shipment; delivery and installation; applications and uses for which this product was not intended; altered product or serial numbers; cosmetic damage or exterior finish; accidents, abuse, neglect, fire, water, lightning or other acts of nature; use of products,

equipment, systems, utilities, services, parts, supplies, accessories, applications, installations, repairs, external plumbing and leaks, external wiring, circuit breakers, fuses or connectors not supplied and authorised by the supplier, or which damage this product or result in service problems; incorrect electrical line voltage, fluctuations, and surges; customer adjustments and failure to follow operating instructions, cleaning, maintenance and environmental instructions that are covered and prescribed in the instruction book; consumable items including light bulbs.

The Sauna shall not be liable for the loss of use of the sauna or other incidental or consequential damages. Under no circumstances shall the supplier or any of its representatives be held liable for injury to any persons or damages to any properties. Specifications are subject to change without notice.

The sauna uses the highest quality wood in our product lines. All structures using wood are susceptible to minor dents, scratches and scuffing. This is normal and will not affect the integrity or operation of your sauna.

Wood is a living material that continues to respond to climate conditions, even after being manufactured into a sauna. Variations in the color or grain, and irregularities such fine cracks are part of the natural beauty of the wood and in no way should be considered defects. During normal operation, wood may crack slightly due to the changes in moisture level. This will not affect the structural integrity of the sauna.

Prior to shipping, the wood is inspected for consistency, colour and quality. Our saunas are shipped around the globe, and can experience slight blemishes, scratches or scuffs in transit. In most cases, these blemishes on the exterior of the sauna can be concealed by using a small amount of furniture polish, oil or other furniture treatment. The interior blemishes, scratches, or scuffs can be either left alone, sanded or a combination of gluing plus sanding. Please avoid any treatment containing benzene or a high concentration of alcohol.

Delivery

Please accept your sauna may be shipped by separate parcels or pallets because of the specified allocation from carrier.

If the Buyer, or a representative of the Buyer, is not present to accept delivery at the time and place indicated by the carrier, the sauna will be left in a safe place, or the Buyer may be liable for costs of storage and re-delivery of the sauna and such costs will be payable prior to the re-delivery of the sauna.

ATTENTION: The Supplier must be notified of any damage to your sauna within two (2) business days of signing the proof of delivery. Failure to notify the supplier within the established time frame will result in the owner taking full responsibility for cost of All Replacement Parts including shipping and handling fees.

Cancellation

If an order is cancelled by the Buyer prior to dispatch of the Products, all monies paid by the Buyer for that order will be refunded, a cancellation fee may be payable by the buyer.

If a cancellation is made after the sauna has been shipped, then the buyer will be responsible for both way shipping charges.

Return & Refund

If the Sauna purchased are and you're not completely satisfied, please contact us at 03 9988 3693 or email us at info@kylinaustralia.com.au. Our experts will assist you and provide with the best solution for you.

Any return or refund request should be within 30 days of the shipping date to get an approval authorization. For change of mind return, the returned sauna must be unused, undamaged, in a good condition with packing materials, along with the shipping pallet. The only exception for return and refund is for units

determined by Kylin Sauna to have a defect in materials and/or workmanship beyond repair.

Seller may refuse to refund all or any portion of payment if buyer fails to fully comply with or violates the terms and conditions of this policy. All returns may be subject to a restocking fee of 20% of valued price.

Keep in mind that the condition of the item sent back to the Kylin is important, please help to repack it carefully. If you return the item used, damaged, missing parts, or damaged during return shipping because it wasn't packaged correctly, Kylin may deduct from the refund to cover the loss in the item's value.

Once the item is delivered to the seller, your refund should be processed within 2 business days. Your refund will be sent to your original payment method and funds are usually available within 3-5 business days.

Legal Rights

In Australia our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. So, as well as your statutory rights referred to above and any other rights and remedies you may have under any other laws relating to your Kylin product, we also provide you with Kylin warranty. It's important to note that this warranty is valid only in the country of purchase.

And if for any reason you wish to contact us, please do so at:
